Hello Alan,

You would need to contact the police force that hold the evidence in relation to this as it sounds like they have shared a different version of the document with you.

Thank you,

Andy Garner
Axon Technical Support Representative

Hello Andy

I have now had a chance to compare the two versions.

There are many differences.

How could this happen as I understand the Axon system issecure?

Regards

Hello Andy

Thanks for quick reply.

The report that I referred to was a 2018 UK police storm report.

I have a copy that was shared with me in 2019 and the one that was shared with me recently.

However, they are not identical.

Is there a reason that they would be different?

Regards

Alan

Subject: Evidence that was shared with me

Hello

The police shared a document with me, a UK police storm report.

I am emailing you to enquire if the report would be exactly the same as a previous copy I have of the same storm report.

Is there anything involved in the process of sharing information that would change anything?

Perhaps the font style, font size etc?

Would I be correct in thinking that the number of characters including spaces, would be the same on both versions?

Regards

Alan
